

## Benefits of going GREEN:

### ➤ Saves you GREEN!

On average, cardboard and paper products account for 40% of solid waste. Recycling your cardboard and paper can reduce your waste cost up to 40%.

### ➤ Enhances your Image!

Being GREEN and promoting sustainability are current marketing trends. Your business benefits from having a "greener" image. There are opportunities for your business to apply for awards and earn recognition.

### ➤ Improves our Future!

Going GREEN ensures a healthier future for our children, your community and the planet. Recycling conserves resources and extends the life of area landfills.

**REDUCE**

consumption and waste

**REUSE**

what you have

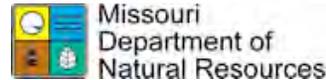

**RECYCLE**

everything you can

## The West Bottoms is going GREEN with support from:

Mid-America Regional Council  
Solid Waste Management District

- Magazines
- Catalogs
- Newspaper
- Paperboard
- Phonebooks
- Paper Bags

"What we do today, right now, will have an accumulated effect on all of our tomorrows."

— Alexandra Stoddard

## Did you know...

- Each ton (2000 pounds) of recycled paper can save 17 trees, 380 gallons of oil, three cubic yards of landfill space, 4000 kilowatts of energy, and 7000 gallons of water. This represents a 64% energy savings, a 58% water savings, and 60 pounds less of air pollution.
- The 17 trees saved (above) can absorb a total of 250 pounds of carbon dioxide from the air each year. Burning that same ton of paper would *create* 1500 pounds of carbon dioxide.
- Recycling 1 ton of cardboard saves 9 cubic yards of landfill space and 46 gallons of oil.
- Recycled cardboard only takes 75 percent of the energy needed to make new cardboard and lessens the emission of sulfur dioxide that is produced when making pulp from wood trees.
